

This year's Hannover Messe will be a chance for the **F.lli Giacomello** company to introduce its newest product, namely the IEG-CRXI, which is certified to ATEX level by the prestigious TUV which is synonymous with guarantee and quality. The CRXI level indicators are marked Ex II 1/2 G Ex ia II C T5 Ga/Gb. Their structural characteristics allow for a constant and continuous indication of the level with highly accurate repeatability, the linear indication of the level, regardless of the shape of the tank and the distance between the level indicator and the sides of the tank, the remote indication of the measurement and the possibility to pilot additional checks. The level of precision is 12 mm, the output is 4-20 mA for continuously reading the check points. This new level indicator can be used in the most varied of environments, in the presence of food and chemicals and in situations where explosive substances are involved.
