

F.lli Giacomello

**Persistent
Organic
Pollutants**

With Regulation (EU) 2019/1021, and subsequent amendment of Annexes IV and V by Regulation (EU) 2022/2400, the European Parliament and the Council regulated the management of persistent organic pollutants (POPs), implementing at Union level the commitments enshrined in the Stockholm Convention on persistent organic pollutants (approved at name of the Union by Council Decision 2006/507/EC) and by the Protocol on Persistent Organic Pollutants of the 1979 Convention on Long-Range Transboundary Air Pollution (approved on behalf of the Union by Council Decision 2004/259/EC) .

The Regulation aims to protect human health and the environment from POPs by banning, phasing out as soon as possible or limiting the manufacture, placing on the market and use of substances subject to the Stockholm Convention and the Protocol on pollutants persistent organics of 1979.

In particular, Regulation (EU) 2019/1021 and its subsequent amendments prohibits the manufacture, placing on the market and use of the substances listed in Annex I, both in their pure state and contained in mixtures or articles, without prejudice to the limitations introduced in article 4.

With this declaration, the company F.lli Giacomello S.r.l. declares that its products, manufactured and placed on the market, comply with Regulation (EU) 2019/1021 and its subsequent amendments and that they are free from the presence of the substances listed in Annex I, classified as persistent organic pollutants (POPs).
